#### TO OUR FRIENDS:

Low buying power of the public in general, together with nature's hountiful production in the country as a whole, whether it be fruit, vegetables, or what not is resulting in rather low prices for products in general. However, when one thinks of the problems and selling prices of various manufactured articles, cannot fruit growers in general, feel their lot is as good as the average industry? Low prices usually mean the weeding out of unfavorable sites or locations, and without doubt sections which must slip hundreds or thousands of miles to market have a real problem. The North Eastern United States will undoubtedly more nearly care for their own markets in the future than they have in the past. A good succession for table and culinary purposes is needed and gradually being supplied. Our own list of varieties is gradually being enlarged as time and experience indicate them to be valuable.

It has always been our policy to give the most for the least possible price. We have no salesmen, and here is a hig saving which we have passed on to our customers. Recently, we have issued an abbreviated catalogue or circular. This of course greatly reduces the cost of our advertising and makes possible a still lower selling rate.

IF FURTHER DESCRIPTION OF VARIETIES IS DESIRED, WE SHALL BE GLAD TO FURNISH A DESCRIPTIVE CATALOGUE UPON REQUEST.

#### CERTIFICATION

Our experience in the past has been that few people are willing to pay the additional cost of having sents pitt out to certify trees. However, we are still continuing our practice of having the trees inspected by Dr. J. K. Shaw of Amherst, Mass., nationally known as the originator of identification of apple trees by their leaf characteristics. Dr. Shaw's statement of inspection for Spring 1932 follows:

#### NON-WARRANTY

We strive to avoid mistakes, but in the event that any nursery stock sold by us should prove untrue to the label under which it is sold, provided notice and proper proof are furnished to the seller, the seller shall, at the option of the buyer, either refill that portion of the order which was mislabeled, by another delivery of stock or refund the purchase price. But in any case the seller is not to be held responsible for a sum greater than the original selling price of such stock. All sales or agreements to sell are made subject to shortage of nursery stock from fire, trosts, drought, or other causes beyond control of the sellers.

#### APPLICATION OF PRICES

Customers may select 5 of any kind of fruit such as 5 peach at the 10 rate, 35 at the 100 rate, 350 at the 1000 rate.

#### MINIMIM ORDER

On account of the high cost of handling orders, we cannot accept orders

DISCOUNT 51, discount may be deducted on all orders where the total amount is

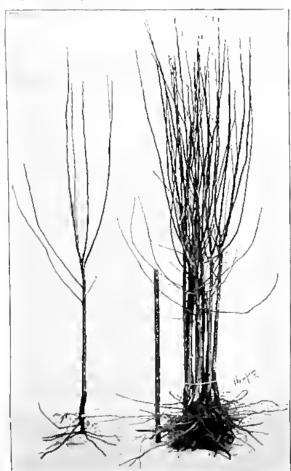

#### remitted with the order and this is sent before April 1st.

SIZE OF TREES Caliber or diameter governs the size of all fruit trees except I year apple.

Height is only approximate.

#### STANDARD APPLE TREES

Permanent apple trees should be planted from 36 to 40 ft. apart. Filler varieties which bear young and consistently such as Wealthy, Wagener, Yellow Transparent, or Rome Beauty, and also peach trees where land and climate are suitable, may be planted between, making the distance 18 to 20 ft. The filler trees will carry along the permanent trees so that when it is necessary to take out part, the cost of growing those remaining will have been paid by the younger, quicker bearing varieties.

2 year old 11 in, and up Baldwins

As the trees begin to crowd, by taking out every other tree, they will be left about 28 ft. apart diagonally, and in later years, again taking out every other tree, will leave them 40 ft. apart. Thus for 25 to 30 years the land will be returning an extra crop before the permanent trees need the room.

We wish also to call attention to our 6 year old upple trees. They were transplanted 4 years ago, making it possible for us to dig them with good roots. Many of these trees bore apples in the nursery row in 1930, and will save the grower much time. We recommend them especially to home planters. Supplied only in varieties starred.

\*Stark, Large, red, late Winter. Very productive. 6 yr. trees only.
\*Stayman Winesap. Standard Winter apple in New Jersey. A good variety for late Winter in some sections of New England. Large, red apple.

Wagener. Great filler variety. Bears young. Red, early Winter. Williams Red. Summer apple. Following Duchess.

Wealthy. I'me filler variety. Often bearing fruit in Nursery at two

\*Yellow Transparent. The first early apple of importance. Fine filler

PEACHES (SERING DUG)

For four years, we have left our peach trees in the field during the winter, having them freshly dug in the spring. The results have been all we could ask, a perfect lot of trees each spring. Repeated cases of 500 or more trees,

the United States had a large crop of peaches, which with low buying power of the public was a hard condition to overcome. Then too, the unseasonably hot weather while New England Elbertii were ripening made a marketing

season of about one week as against two or three weeks normally. Cases of

On account of our peach trees being in the field we will not have an accurate grade count until spring, which may make a substitution of sizes

necessary in certain instances, but we hope not. Order early and have the

Shrubs naturally vary in their habits of growth. Some dwarf, others of medium growth, and still others larger. We shall in each instance furnish number one plants of the varieties listed.

\$0.50 except where otherwise stated. Althea. (Rose of Sharon) Red, pink, or white. Very erect. Late summer. Almond. Pink Flowering. Beautiful old fashioned plant. Each 75c. Azalia Mollis. A Japanese variety ranging from yellow to orange. 12-18

in. @ \$2.00, Azalea Kaempferi. (Torch Azalea) Beautiful orange red flowers. 12-15 in. or \$2,00 each.

Azalea Amoena. A beautiful evergreen shrub, covered with small, rosy pink flowers in May. We offer selected plants—broad and bushy. 15-18 in. height @ \$2,50 each. Barberry. Red Leaved. 18-24 in. @ 50c.

Beanty Bush. One of the newer varieties. Very profuse bloomer, with pink flowers in early June. Butterfly Bush. Although of a woody nature, the growth kills back each

winter to within a few inches of the ground, then making three to five feet the following summer, it being covered with purple or lavender sweet scented flowers which attract myriads of butterflies. Hence its Coral Berry. Pink flowers, followed by red berries.

Deutzia Gracilis. Dwarf, white, June.

Forsythia Fortunei. (Golden Bell) Brilliant yellow in late April or early May. Forsythia Speciabilis. One of the earliest and most profuse bloomers. Forsythia Suspensa. A drooping variety-sometimes trained as a vine. Its

drooping branches make a beautiful sight. Honeysnekle, Pink Tartarian. Pink newers. June. Followed by red berries in late summer. Very attractive. Honeysuckle, White Tartarian. Similar to the pink variety, but flowers white. Hydrangea P. G. Large cone shaped flowers. Late summer.

Hydrangea Hills of Snow. White ball shaped flowers. July till frost. Japan Quince. Brilliant scarlet flowers in May.

Japan Kerria Fl. Pl. A most striking bush with greenish bark and double yellow blossoms in June. 75c each. Lilac. Purple. Lilae. Named varieties, 2-3 ft. @ 75c.

Amelia Dupry. Single, light blue. Doyan Ketteler. Double, light pink. Mailant Lemoine. Large, double white. President Grevy. Double, dark blue. President Carnot. Double, pale blue. Sonv. de Ludwig Spaeth. Single, red.

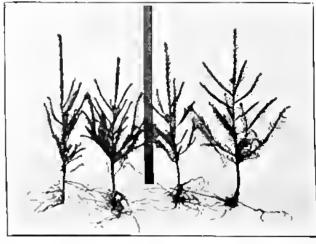

Mock Orange. Cream colored, very sweet scented flowers. June. Mock Orange Virginalis. An improved variety of the old fashioned Mock Orange. Larger flower, 75c each.

Spirea Anthony Waterer. Dwarf. Pink. June and July. Spirea Triencarpa. (Korean Spirea) One of the newer varieties similar to Spirea Van Houttei-blossoming later. 75c each. Spirca Van Houttei. Mass of white. Early June.

Snowhall, Japan. White hall shaped flowers. Late May. Each 75c. Snowherry. Pink flowers followed by white berries in fall. Weigelia Eva Rathke. Crimson flowers. June. Weigelia Rusen. Pink. Early June. William, Pussy. Early, large flowering. 4-5 ft. (# 75c.

EVERGREENS We offer for forestry, windhreak, or Christmas free planting, 4 year transplants in the following varieties:

Norway Spruce, 8-45 m. \$6.00 S50 00 Douglas Fir, 6-10 m. 6.00 50.00Cohirado Spruce, 6-10 m. 6 00 50 00 White Surnce, 8-12 in. 6 00 50 00 Anstrian Pine, 10-15 in. 6.00 50.00 Scotch Pine, 10-18 in. 7 50 65 00

4 year transplants of Narway Spruce, 8-15"

Our Scotch Pine especially, are a wonderful lot averaging from 12-15 in. and fine, stocky, well branched trees. We cannot afford to grow and dig them for this price, but we have thousands of them and this offer is our customers' gain.

4 year transplants of Stotch Pine, 10-18'

For ornamental purposes, we can furnish about 75 varieties of evergreens in numerous sizes. These have been transplanted every three years, pruned every year, and are first class in every respect -in fact much broader and thicker than the average grade of evergreens as offered by various nurserymen. A special descriptive list of sizes and price list will be mailed upon request.
